Source: prepared by UNICA with data from Secretariat of Foreign Trade (SECEX).

Notes:

1. Data from South-Central and North-Northeast regions has been compiled according to the state where the exporting company is located – i.e., corresponds to the state where the agricultural product has grown or where the last stage of the manufacturing process occurred;
2. South-Central region includes the states of São Paulo, Rio de Janeiro, Paraná, Rio Grande do Sul, Santa Catarina, Goiás, Mato Grosso, Mato Grosso do Sul, Minas Gerais and Espírito Santo. North-Northeast region includes the following states: Acre, Alagoas, Amazonas, Bahia, Ceará, Maranhão, Pará, Paraíba, Pernambuco, Piauí, Rio Grande do Norte, Roraima, Sergipe and Tocantins;
3. Statistics appearing on the SECEX database as "undeclared zone", "national product", "undeclared" or "re-export" were added to the class Others, due the impossibility of identifying the state of origin of the product;
4. Export volume, expressed in cubic meters (m³), is calculated by dividing the net weight of the exported ethanol (expressed in kilograms and published by Secex), by the ethanol average density of 0.8 g/cm³;
5. Value of exports FOB (Free On Board) expressed in current US dollars.
